

U.S. DEPARTMENT OF AGRICULTURE  
 AGRICULTURAL MARKETING SERVICE  
 SCIENCE AND TECHNOLOGY - PLANT VARIETY PROTECTION OFFICE

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552a) and the Paperwork Reduction Act (PRA) of 1995.

Application is required in order to determine if a plant variety protection certificate is to be issued (7 U.S.C. 2421). Information is held confidential until certificate is issued (7 U.S.C. 2426).

**APPLICATION FOR PLANT VARIETY PROTECTION CERTIFICATE**  
*(Instructions and information collection burden statement on reverse)*

1. NAME OF OWNER <b>University of Idaho</b>		2. TEMPORARY DESIGNATION OR EXPERIMENTAL NAME <b>UI.3277.74.WH.8.6</b>		3. VARIETY NAME <b>White Gold</b>											
4. ADDRESS (Street and No., or R.F.D. No., City, State, and ZIP Code, and Country) <b>University of Idaho, OTT, Morrill Hall 414 875 Perimeter Dr MS 3003 Moscow, Idaho, 83844-3003</b>		5. TELEPHONE (include area code) <b>(208) 885 4550</b>		FOR OFFICIAL USE ONLY  <b>July 9, 2014</b>

**GENERAL INSTRUCTIONS:** To be effectively filed with the Plant Variety Protection Office (PVPO), **ALL** of the following items must be **received** in the PVPO: (1) Completed application form signed by the owner; (2) completed exhibits A, B, C, E, F; (3) for a tuber reproduced variety, verification that a viable (*in the sense that it will reproduce an entire plant*) tissue culture will be deposited and maintained in an approved public repository; and (4) payment by credit card or check drawn on a U.S. bank for \$4,382 (\$518 filing fee and \$3,864 examination fee), payable to "Treasurer of the United States" (See Section 97.6 of the Regulations and Rules of Practice). **NEW:** With the application for a seed reproduced variety **or by direct deposit soon after filing**, the applicant must provide at least 3,000 viable untreated seeds of the variety *per se*, and for a hybrid variety at least 3,000 untreated seeds of each line necessary to reproduce the variety. Partial applications will be held in the PVPO for not more than 90 days; then returned to the applicant as un-filed. Mail application and other requirements to Plant Variety Protection Office, AMS, USDA, Room 401, NAL Building, 10301 Baltimore Avenue, Beltsville, MD 20705-2351. Retain one copy for your files. All items on the face of the application are self explanatory unless noted below. Corrections on the application form and exhibits must be initialed and dated. **DO NOT** use masking materials to make corrections. If a certificate is allowed, you will be requested to send a payment by credit card or check payable to "Treasurer of the United States" in the amount of \$768 for issuance of the certificate. Certificates will be issued to owner, not licensee or agent.

**NOTES:** It is the responsibility of the applicant/owner to keep the PVPO informed of any changes of address or change of ownership or assignment or owner's representative during the life of the application/certificate. The fees for filing a change of address; owner's representative; ownership or assignment; or any modification of owner's name is specified in Section 97.175 of the regulations. (See Section 101 of the Act, and Sections 97.130, 97.131, 97.175(h) of the Regulations and Rules of Practice.)

**Plant Variety Protection Office**  
**Telephone:** (301) 504-5518 **FAX:** (301) 504-5291  
**General E-mail:** PVP@mail.usda.gov  
**Homepage:** <http://www.ams.usda.gov/science/pvpo/PVPindex.htm>

**SPECIFIC INSTRUCTIONS:**

To avoid conflict with other variety names in use, the applicant must check the appropriate recognized authority and **provide evidence** that the permanent name of the application variety (even if it is a parental, inbred line) has been cleared by the appropriate recognized authority before the Certificate of Protection is issued. For example, for agricultural and vegetable crops, contact: U.S. Department of Agriculture, Agricultural Marketing Service, Livestock and Seed Programs, **Seed Regulatory and Testing Branch**, 801 Summit Crossing Place, Suite C, Gastonia, North Carolina 28054-2193 Telephone: (704) 810-8870. <http://www.ams.usda.gov/lsg/seed.htm>.

**ITEM**

- 19a. Give: (1) the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method; (2) the details of subsequent stages of selection and multiplication; (3) evidence of uniformity and stability; and (4) the type and frequency of variants during reproduction and multiplication and state how these variants may be identified
- 19b. Give a summary of the variety's distinctness. Clearly state how this application variety may be distinguished from all other varieties in the same crop. If the new variety is most similar to one variety or a group of related varieties:
  - (1) identify these varieties and state all differences objectively;
  - (2) attach replicated statistical data for characters expressed numerically and demonstrate that these are clear differences; and
  - (3) submit, if helpful, seed and plant specimens or photographs (prints) of seed and plant comparisons which clearly indicate distinctness.
- 19c. Exhibit C forms are available from the PVPO Office for most crops; specify crop kind. Fill in Exhibit C (Objective Description of Variety) form as completely as possible to describe your variety.
- 19d. Optional additional characteristics and/or photographs. Describe any additional characteristics that cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the characteristics that are difficult to describe, such as plant habit, plant color, disease resistance, etc.
- 19e. Section 52(5) of the Act requires applicants to furnish a statement of the basis of the applicant's ownership. An Exhibit E form is available from the PVPO.
- 20. If "Yes" is specified (*seed of this variety be sold by variety name only, as a class of certified seed*), the applicant **MAY NOT** reverse this affirmative decision after the variety has been sold and so labeled, the decision published, or the certificate issued. However, if "No" has been specified, the applicant may change the choice. (See Regulations and Rules of Practice, Section 97.103).
- 23. See Sections 41, 42, and 43 of the Act and Section 97.5 of the regulations for eligibility requirements.
- 24. See Section 55 of the Act for instructions on claiming the benefit of an earlier filing date.

- 22. CONTINUED FROM FRONT** (Please provide a statement as to the limitation and sequence of generations that may be certified.)
- 23. CONTINUED FROM FRONT** (Please provide the date of first sale, disposition, transfer, or use for each country and the circumstances, if the variety (including any harvested material) or a hybrid produced from this variety has been sold, disposed of, transferred, or used in the U.S. or other countries.) **Foundation seed of White Gold was sold in May 2014 to be planted for increasing certified seed.**
- 24. CONTINUED FROM FRONT** (Please give the country, date of filing or issuance, and assigned reference number, if the variety or any component of the variety is protected by intellectual property right (Plant Breeder's Right or Patent).)

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0581-0055. The time required to complete this information collection is estimated to average 1.4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

**‘White Gold’  
Yellow Mustard  
*Sinapis alba* L.**

**Exhibit A: Origin and Breeding History**

‘White Gold’ is a yellow condiment spice mustard (*Sinapis alba* L.) cultivar developed for use as a condiment spice by the Idaho Agricultural Experiment Station and released in April 2014. This cultivar is protected by U.S. Plant Variety Protection (PVP pending).

White Gold is an open-pollinated cultivar selected for high adaptation to the dry-land environments of the Pacific Northwest (Idaho, Oregon and Washington). The cultivar was developed from a population selected from an accession (SIN 32/77) supplied by the Central Institute of Genetics and Crop Plant Research in the German Democratic Republic (DDR), now the Leibniz Institute of Plant Genetics and Crop Plant Research. The original breeding population was evaluated in the field during 1994, and further replicated field evaluation began using this seed source in 1995. After the initial evaluation, the population was re-designated as SN-3277 (i.e. *Sinapis alba* 3277) and later as UI.3277.

UI.3277 was evaluated as a bulk population over 4 years in local yield trials and thereafter tested in the Pacific Northwest Regional Mustard Variety Trials (PNWMVT) from 1998-2001. Throughout this time the population bulk showed good adaptability with yield potential, bright colored large yellow seeds and with good pungency.

In fall of 2001, 400 single plant selections were taken from the UI.3277 bulk population, and one seed from each plant was planted in a pot in the greenhouse. Non-uniform variants or off-type plants were removed throughout the growing season. In spring 2002, seed from 280 of the greenhouse increased plants were planted in pre-breeder seed plots and Breeders Seed was harvested by bulking uniform plots at harvest. This seed source was then used to evaluate the ‘selected’ UI.3277 in the PNWMVT trial 2004-2008. Results from these evaluations showed that the cultivar still had commercial potential but release was delayed because a number of white flower variants (most likely arising from natural mutation) were observed in the selected population.

In summer of 2007 80 white flower mutants were tagged and later harvested and threshed separately at maturity. Seed from these selections were grown in the greenhouse in fall of 2007, harvested in spring of 2008, and grown in bulk yield trials and progeny yield trials that summer. From among these initial 80 mutant lines, one superior population was selected (UI.3277.74.WH.8.6) and used to plant Breeders’ seed of White Gold in spring of 2012. Foundation seed was planted in spring of 2013 and harvested in the fall.

During certification of Breeders and Foundation seed, less than 100 yellow flower variants per acre were observed (i.e. less than 100 of a possible 500,000 plants or 1:5000).

**‘White Gold’  
Yellow Mustard  
*Sinapis alba* L.**

**Exhibit B: Statement of Distinctness**

White Gold is most similar in plant appearance to the spring canola cultivar IdaGold (Brown et al., 1997). However, White Gold has markedly different flower petal color. IdaGold flowers (similar to all other yellow mustard cultivars) has bright yellow flower petal color, compared to White Gold which has a pale, white-cream colored flower (Figure B1).

\* 0 Other \_\_\_\_\_

**16. COMMENTS** (Please give any additional comments which characterizes the variety)

Seed glucosinolate profile and total ( $\mu\text{mol gm}^{-1}$ )

Total	Progoitrin	Sinalbin
157.0	3.0	154.0

**17. DIRECTIONS**

Select the number which characterizes the variety in the features above. Those characteristics marked with an asterisk "\*" should be recorded. Any others should be recorded if possible to help establish novelty or uniqueness. Characteristics described, including numerical measurements, should represent those that are typical for the variety. Give test area \_\_\_\_\_ conditions \_\_\_\_\_.

**18.**

**‘White Gold’  
Yellow Mustard  
*Sinapis alba* L.**

**Exhibit D: Additional Description of Variety**

Morphology and agronomic performance of White Gold were compared to IdaGold yellow mustard (Brown *et al.*, 1998) and/or Tilney yellow mustard. IdaGold was developed at the University of Idaho and has been grown commercially throughout the Pacific Northwest and over a wide range of environments throughout the USA. Tilney was developed by Reckitt & Colman Ltd in England, UK, and has been grown commercially in many mustard producing regions of the world.

Peduncle length, pod length and beak length of White Gold seed pods are all significantly shorter than those from IdaGold (Table D1). White Gold also has significantly fewer seeds per pod than IdaGold but White Gold seeds are significantly larger (considered to be an indicator of high quality) (Table D1).

White Gold plants emerge and establish quickly in the spring, significantly better than Tilney (Table D2). White Gold plants reach 50% flower bloom 58-59 days after planting which was similar to both IdaGold and Tilney (Table D3). After flower ending, White Gold plants were on average 49 inches tall, similar height to IdaGold but significantly taller than Tilney (Table D4). White Gold plants have stiff stems and are not prone to lodging at maturity (Table D5).

Yield performance of White Gold was compared to IdaGold and Tilney when grown in the Pacific Northwest Mustard Variety Trials (PNWMVT) from 2009 through 2013 (Table D6). Over this period White Gold was evaluated for yield potential over 44 different environments covering a range of locations throughout Idaho, Washington and Oregon. Yellow mustard crops in general are suited to the drier and hotter regions of the Pacific Northwest, and this was represented in the sites used for the PNWMVT trials. Sites used for the PNWMVT included traditional tillage systems and direct seed systems. Averaged over the 44 year-sites, White Gold produced 1,679 kg ha<sup>-1</sup>, which was significantly higher yielding than IdaGold (1,594 kg ha<sup>-1</sup>) or Tilney (1,585 kg ha<sup>-1</sup>). Over the 5 years of testing, White Gold was the highest yielding cultivars in 4 of the years. 

Total seed glucosinolate content of White Gold was significantly lower than the high glucosinolate cultivar IdaGold (Table D7). The seed glucosinolate composition of White Gold was similar to IdaGold with over 98% of the total glucosinolate being *p*-hydroxybenzyl glucosinolate. Despite having significantly larger seed size, seed mucilage content of White Gold was not significantly lower than the high mucilage cultivar IdaGold (Table D8). However, over the 4 years of mucilage testing (11 year-sites) White Gold mucilage content was significantly lower than Tilney.

Seed oil content of White Gold was significantly  higher (278 g kg<sup>-1</sup>) than both IdaGold (265 g kg<sup>-1</sup>) and Tilney (264 g kg<sup>-1</sup>) (Table D9). It should be noted that all three cultivar oil

contents were well within the industry standards for high quality condiment mustard. Fatty acid profile of White Gold seed oil was almost identical to that produced by IdaGold (Table D10). Fatty acid profile of condiment yellow mustard seed oil is not considered a quality consideration and is presented here purely for descriptive purposes.

**Table D1.** Peduncle, pod, and beak length, number of seeds per pod and weight of 1,000 seeds of White Gold, IdaGold and Tilney. Data are collected from replicated field trials grown at 4 locations.

Cultivar	Length of			Number of seeds	1000 seed weights

Application is required in order to determine if a plant variety protection certificate is to be issued (7 U.S.C. 2421). The information is held confidential until the certificate is issued (7 U.S.C. 2426).

**EXHIBIT E  
 STATEMENT OF THE BASIS OF OWNERSHIP**

1. NAME OF APPLICANT(S)  University of Idaho	2. TEMPORARY DESIGNATION OR EXPERIMENTAL NUMBER UI.3277.74.WH.8.6	3. VARIETY NAME  White Gold
4. ADDRESS (Street and No., or R.F.D. No., City, State, and ZIP, and Country)  OTT, PO Box 443003 Morrill Hall 414 Moscow, Idaho, 838443003	5. TELEPHONE (Include area code)  208 885 4550	6. FAX (Include area code)  208 885 4551
	7. PVPO NUMBER  201400386	

8. Does the applicant own all rights to the variety? Mark an "X" in the appropriate block. **If no, please explain.**  YES  NO

9. Is the applicant a U.S. national or a U.S. based entity? **If no, give name of country.**  YES  NO

10. Is the applicant the original owner?  YES  NO **If no, please answer one of the following:**

a. If the original rights to variety were owned by individual(s), is (are) the original owner(s) a U.S. National(s)?

YES  NO **If no, give name of country**

b. If the original rights to variety were owned by a company(ies), is (are) the original owner(s) a U.S. based company?

YES  NO **If no, give name of country**

11. Additional explanation on ownership (Trace ownership from original breeder to current owner. Use the reverse for extra space if needed):

**PLEASE NOTE:**

Plant variety protection can only be afforded to the owners (not licensees) who meet the following criteria:

1. If the rights to the variety are owned by the original breeder, that person must be a U.S. national, national of a UPOV member country, or national of a country which affords similar protection to nationals of the U.S. for the same genus and species.
2. If the rights to the variety are owned by the company which employed the original breeder(s), the company must be U.S. based, owned by nationals of a UPOV member country, or owned by nationals of a country which affords similar protection to nationals of the U.S. for the same genus and species.
3. If the applicant is an owner who is not the original owner, both the original owner and the applicant must meet one of the above criteria.

The original breeder/owner may be the individual or company who directed the final breeding. See Section 41(a)(2) of the Plant Variety Protection Act for definitions.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0581-0055. The time required to complete this information collection is estimated to average 0.1 hour per response, including the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotope, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
